Information Sheet

Art Fresco Design is a mural design and painting business run by artist **Graeme Miles Richards**. He has worked both locally and internationally in this industry for over 15 years.

While the website demonstrates the range and versatility of his work, some Clients and Designers prefer to have information which can be printed out and stored on file. This document is for that purpose.

Pricing

The initial consultation with a client is free. This is where the clients' brief for the mural are discussed, including project specifications, and the budget allocated to the work.

Following this initial consultation, the client then decides whether to employ Graeme to come up with a range of designs for a set fee. The design fees are absorbed into the overall project fee if the client decides to go ahead with the work.

The exact quotation for a project can only be given after the specifics of the job have been decided on. The price varies according to complexity of design, location, and props (eg. scaffolding) required for the job. However, to get a general idea, if you pick a specific artwork on the website, we can let you know the 'basic' cost for this kind of work. (<http://www.artfresco.dmn.com.au>)

Graeme has worked in Singapore, Indonesia, New Zealand, as well as Australia. He is happy to work in a range of locations, or to create work which can be shipped to sites around the world.
